PLAYING OUTSIDE AND JUMPING AROUND

ABOUT US

The company Evers has existed at its current location in Rhede-Bruhl in northern Germany for over 100 years. The GoKarts product line was added over 25 years ago. Inspired by the well-known "Kettcar" and in connection with the existing claim in agricultural engineering to build a product "for eternity", the first DINO CAR was welded by hand and fitted with large wheels from wheelbarrows. Young and old were thrilled. The DINO CAR was born.

Today DINO CARS produces GoKarts in different sizes, with comfortable freewheels, backpedal brakes and gear shifts for children from 3 years to adulthood. The range is rounded off by accessories such as a loading shovel, trailer and additional seats.

SUSTAINABILITY

DINO CARS GoKarts are extremely robust and stable. Our GoKarts are passed on to siblings and within families over several generations.

DINO CARS also offers a comprehensive spare parts and repair service for older GoKarts. The resale value of DINO CARS GoKarts is extremely high.

SECURITY AND QUALITY „MADE IN GERMANY“

DINO CARS GoKarts are safe and checked for functionality. The GoKarts carry the CE mark. Careful production and permanent quality checks guarantee safe fun for all outdoor kids. When used properly, DINO CARS grants a 2-year guarantee against frame breakage.

SELECTION CRITERIA AND DESIGN

Children and parents have individual ideas for choosing the right GoKart. In addition to different frame sizes for all ages, DINO CARS also offers variants with matching design themes. The RACE LINE, EDITIONS and TRACKS product lines in particular meet these requirements.

GoKarts can be equipped in the configurator of the STYLEZ product line according to your own wishes. DINO CARS will be happy to meet other equipment requirements on request.

ONLINE

DINO CARS offers extensive advice on the topics of new purchases and spare parts both by telephone and online. In the on-site factory sales and in the online SALE there are regular special offers marketed.

TOGETHER THE BEST

We look forward to your experiences and suggestions so that we can continue to develop the best GoKarts for your children in the future.

AF

The AUTOMATIC FREEWHEEL allows driving forward and backward without manual switching.

BF1

With the BRAKE FREEWHEEL BF1 you can drive forwards and backwards without switching. The integrated backpedal brake lets you stop particularly safely and comfortably.

BF3

The BRAKE FREEWHEEL with 3-speed gearshift allows forwards and backwards driving without additional switching. Here, the integrated backpedal brake ensures that you can stop particularly safely and comfortably. The 3 gears create the right translation - even off-road.

F

FREEWHEEL
Allows forwards travel. Good for professional use.

BONNET
The cool look with increased streamlinedness.

FLOATING FRONT AXLE
(stored in a socket) This means that you are stable on rough roads.

BALL HEAD STEERING
It enables particularly easy steering.

4-6 SEAT ADJUSTMENT
Easy adjustment of the seat.

ROLL BAR

EASY RUN TIRES
For the low rolling resistance.

TRACTOR STYLE TIRES
Super grip on dirt roads.

OFFROAD TIRES
Super grip in rough terrain.

SPORT STEERING WHEEL
Indispensable for the sporty driving feeling.

Kids

The robust KIDS LINE is extremely stable

Thanks to the simple seat adjustment, our GoKarts grow with all kids from 3 to 9 years. They also run extremely easily thanks to pneumatic tires and built-in ball bearings. The GoKarts are equipped as standard with the backpedal brake patented by Dino Cars.

Driving forwards and backwards is not a problem. Freewheeling is a matter of course. With the front lifting device and the loading shovel, all work at home and yard can be done quickly. The additional seat with anti-tip is ideal for the siblings.

Classics

Our CLASSICS are constant improved form of the „ORIGINAL DINOS“.

These stable go-karts offer all essential features and also forgive a robust driving. The adjustable seating position adapts optimally to your size.

Our sport models have one large swing axle and low-friction tires with ball bearings. This combination ensures optimal traction.

In addition, all DINO CARS® as from the Sport model range are equipped with plastic bushings and welded steel reinforcements in the seat retainers. This makes deflection of the seat impossible.

PROLINE

DINO CARS offers a variety of pedal GoKarts for event organizers, bike rental companies, campsites, holiday farms and amusement parks that are particularly suitable for professional use. These karts are often rented to young and old by the hour, day or week. An investment that is always worthwhile for the operator.

TRAMPOLINES

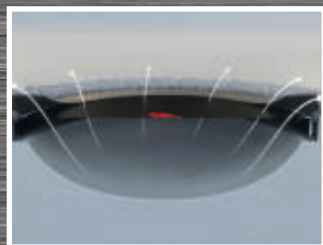

JUMPING AROUND

BEST QUALITY

EN 1176-1:2017

LIFETIME FRAME WARRANTY

UP TO 70% MORE WIND STREAM

D-RING WITH STEEL REINFORCEMENTS

DINO CARS TRAMPOLINES QUALITY AND FUN IN A CLASS OF ITS OWN

Trampolines offer children and adults the possibility to play and jump even on small places. DINO CARS is well known from all fans as a producer of safe pedal GoKarts for decades. From February 2020 we offer top-class trampolines called **PROLINE** and **FLAT LEVEL**.

SAFETY AND WARRANTY

The trampolines are approved for public areas as well as for private use. The trampolines are TÜV checked. DINO CARS uses only the best materials. The trampoline frame is galvanized from inside and outside. DINO CARS is giving a lifetime warranty on the frame in private use. The same applies to the springs. Here is the warranty of 10 !!! years included.

WIND STREAM

The **WIND STREAM** jumping sheet allows a significantly higher air permeability of more than 70% compared to standard trampolines. As a result, the resistance is reduced when jumping and higher jumps are possible.

PROTECTION COVER

All trampolines have an extra strong protection cover. The cover secures the jumpers additionally. The materials used are extremely UV-resistant.

D-RING HOLDERS

The spring holders are produced inside with steel reinforcements. The D-rings are plastic-coated in addition to further safety.

OTHER WARRANTIES

Edge cover = 3 years

Jumping sheet = 3 years

Spare parts service = 15 years

DINO CARS PRO LINE TRAMPOLINES

This is healthy fun for kids and forever young adults. There are hardly no limits for exercises on the trampoline. Bounce and sense of balance can be trained without additional pressure on your joints.

PRO LINE trampolines are perfect for any garden. The assembly is very easy. The quality is outstanding. This is also confirmed by the TÜV.

DINO CARS trampolines are already equipped as standard with self-closing safety net and ladder.

The trampolines are available in 3 sizes.

Article	Name	Ø cm	Height of frame	Max. user weight	Number of springs	Length of spring mm	Thickness of protection cover	Width of protection cover	Total weight
DTGR-10-SET-BD	DINO PROLINE SAFETY NET & LADDER INCLUDED	305	76 cm	140 kg	72	178	25 mm	320 mm	88 kg
DTGR-12-SET-BD	DINO PROLINE SAFETY NET & LADDER INCLUDED	365	89 cm	160 kg	80	215	25 mm	400 mm	131 kg
DTGR-14-SET-BD	DINO PROLINE SAFETY NET & LADDER INCLUDED	430	89 cm	160 kg	96	215	25 mm	400 mm	138 kg

DINO CARS FLAT LEVEL TRAMPOLINES

For those who do not want to jump so high above the ground!

FLAT LEVEL trampolines are inconspicuously and safely installed in the ground. The installation depth is approx. 60-80 cm depending on the total size of the trampoline. The protection cover is 32 - 40 cm wide.

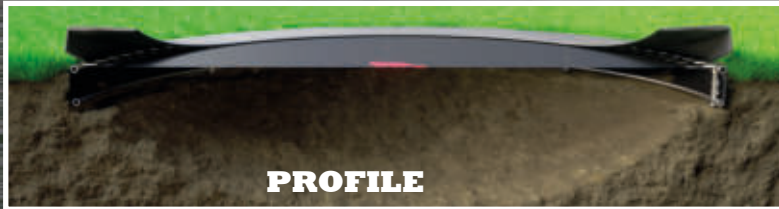

The frame construction is highly stable and galvanized. This guarantees a long-term jump fun.

For **FLAT LEVEL** trampolines a safety net is available as an option. The safety net is self-closing and especially recommended for inexperienced jumpers.

The safety net will be fixed along the frame construction.
